

FOR IMMEDIATE RELEASE

Cedar Springs Dental to Build New Office

Dental practice incorporates cutting edge technology to prioritize patient health and safety

May 11, 2020 – Cedar Springs, Mich.

Cedar Springs Dental broke ground today on its new 3,000 square foot office to replace the current 1,000 square foot facility located at 20 East Church Street NE in Cedar Springs, Michigan. The new facility will utilize negative pressure isolation technology for staff and patient safety and is being built adjacent to the current practice. It is expected to open after the turn of the new year.

Through the leadership of Dr. Setaputri, Cedar Springs Dental is implementing cutting-edge technology to ensure patient health and safety. Each operatory will include Grade-A, water filtration systems as well as a single point of entry by way of a limited-touch door. Additionally, each operatory will function as a negative pressure isolation room and will include air purification systems that offer surgical-quality air and limit patient exposure to harmful aerosols. Through these means, Dr. Setaputri will be able to treat his patients in a safer, cleaner environment. The office will also include nine operatories, a surgical suite, and a waiting area.

The project has been in the works since the day Dr. Andy Setaputri purchased the practice from Dr. Danette Martin in 2018. Tripling the size of his current facility will allow Dr. Setaputri to see more patients, as well as bring on his business partner and brother, Zane Setaputri, DDS, without compromising the level of care and service each patient receives.

"We have experienced incredible growth over the past 2 years and are seeing over 60 new patients a month! Our current facility is simply too small and outdated to meet our current needs. Building from the ground-up allows us to create the perfect space that prioritizes patient health and safety, as well as prepares us well for future growth. The design and layout of the new office supports the culture we've worked hard to establish and allows us to add three full-time positions to the team," commented Dr. Andy Setaputri.

"This project would not be possible without the overwhelming support of our patients who continue to trust us for their dental care," added Dr. Andy Setaputri. *"We are very proud to be a part of the Cedar Springs Community and are confident this new space will allow us to continue to provide the best in dental care for many years to come."*

An Open House for all current patients and the Cedar Springs community will be held at the beginning of the new year. The date has not yet been set.

Grand Rapids-based First Companies will manage construction. Grand Rapids-based Dixon Architecture is the architect.

The Future Home of Cedar Springs Dental
